

Social Media Do's and Don'ts checklist

Do's	Don'ts
Set to Private: Regularly audit your privacy settings to control who sees your personal posts.	Don't Overshare: Avoid posting sensitive data like your home address, phone number, or current live location.
Think Before Posting: Ask yourself if the content is helpful, kind, and professional before hitting "send".	Don't Cyberbully: Never engage in, like, or share content that harasses or demeans others.
Verify Information: Check the facts before sharing news to prevent the spread of misinformation.	Don't Post During Heightened Emotions: Avoid ranting about professors, peers, or employers while angry.
Give Credit: Always cite or tag the original creator when sharing someone else's work or photos.	Don't Share Passwords: Never share your login credentials or OTPs with anyone, even friends.
Maintain Professionalism: Ensure your public profile reflects the image you want a future recruiter to see.	Don't Click Suspicious Links: Avoid clicking on "clickbait" or links from unknown accounts that could lead to phishing.
